

# Native Plant and Pollinator Interactions at the Pine Hill Preserve

By: Landon Eldredge (BLM Biological Technician)

*Rhamnus ilicifolia*

*Ceratina* sp.

# Study Site:

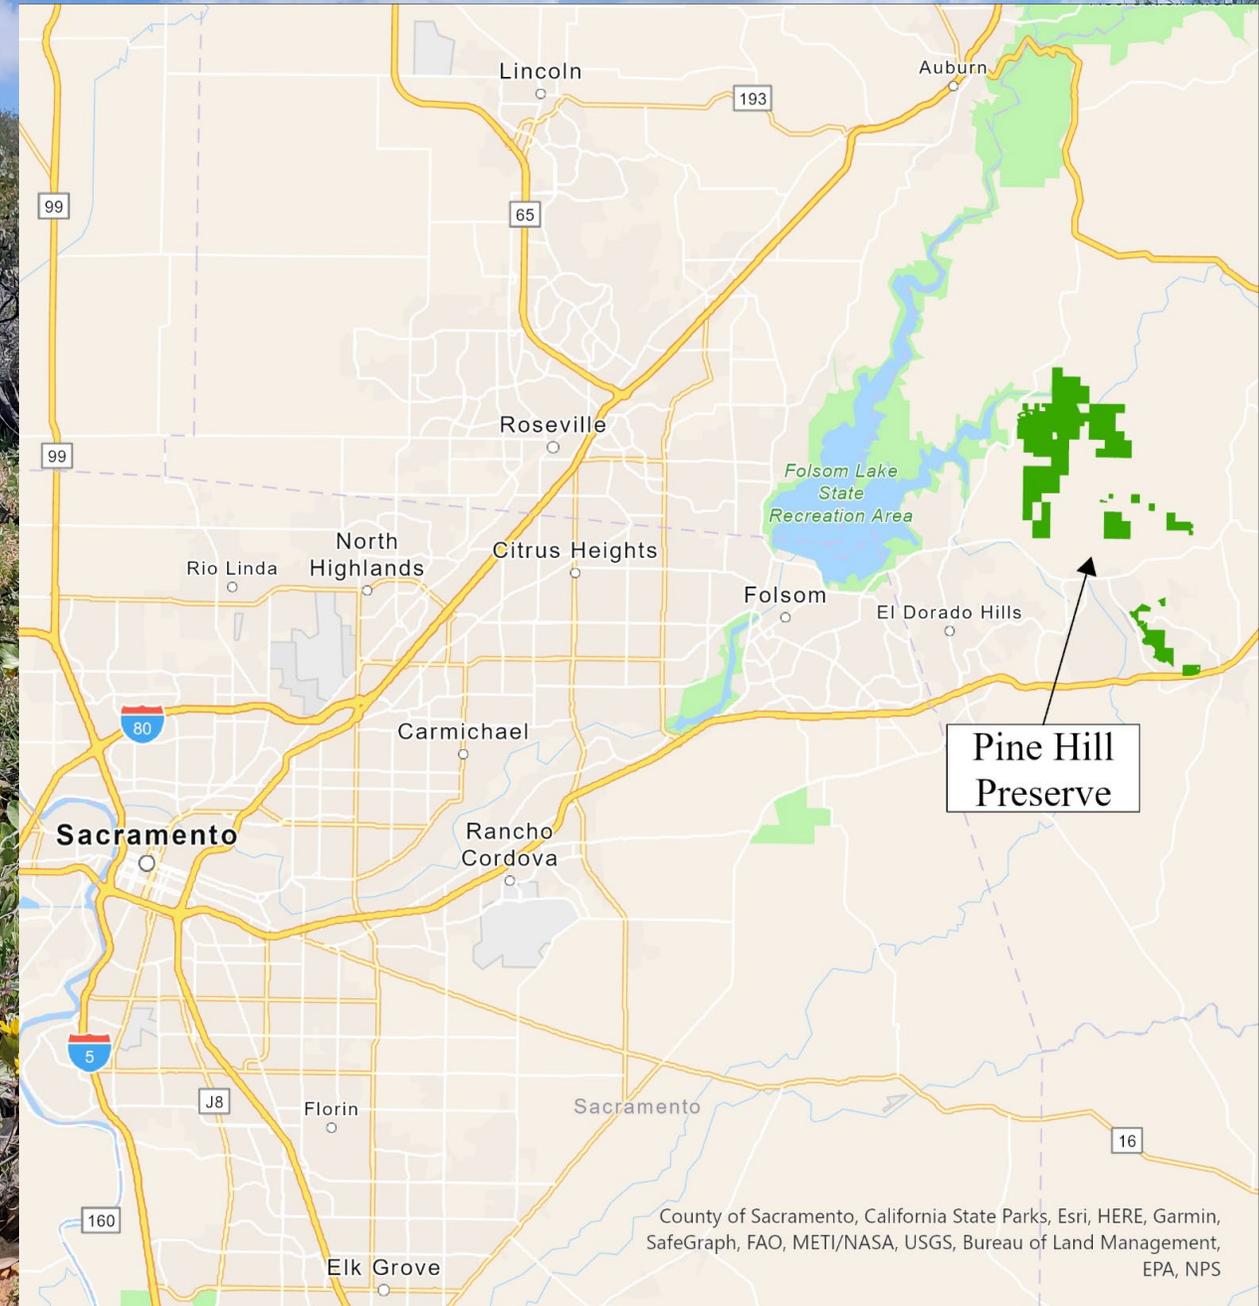

## Pine Hill Preserve

- ~35 miles east of Sacramento
- ~5,000 acres of managed lands
- Cooperative conservation effort of 10 different agencies
- ~10% CA's native flora
- 8 rare plants
- Gabbro soils of the Rescue series
- Vegetation management for rare plants

## Methods:

(2014-2023)

- Hand net → freeze → pin → label each specimen. Pinned and labeled specimens sent to taxonomists for ID.

## Fuels, Fire, and Bees

### *Calystegia stebbinsii* (CAST)

- Federally endangered
- Population flourishing in burned areas

### *Diadasia bituberculata*

- Morning glory pollen specialist
- Nests in bare soil within the *C. stebbinsii* population
- Males and females regularly contact sexual parts of flower

### *Fremontodendron decumbens* (FRDE)

- Federally endangered
- Most prevalent in fuel break area
- Needs fire for germination
- Callanthidium illustre*, which made up roughly 9% of bee visitations from Boyd's previous research has not been detected in our surveys (Boyd, 1994)

# Results

<i>Wyethia reticulata</i>	<i>Packera layneae</i>	<i>Ceanothus roderickii</i>	<i>Chlorogalum grandiflorum</i>	<i>Crocanthemum suffrutescens</i>	<i>Fremontodendron decumbens</i>	<i>Calystegia stebbinsii</i>
<i>Andrena pallidifovea</i>	<i>Andrena pallidifovea</i>	<i>Andrena chlorogaster</i>	<i>Apis mellifera</i>	<i>Ceratina nanula</i>	<i>Apis mellifera</i>	<i>Apis mellifera</i>
<i>Anthidium placitum</i>	<i>Ashmeadiella cubiceps</i>	<i>Andrena annectens</i>	<i>Bombus californicus</i>	<i>Dianthidium dubium</i>	<i>Eucera stretchii</i>	<i>Diadasia bituberculata</i>
<i>Anthidium utahense</i>	<i>Bombus vosnesenskii</i>	<i>Sphecodes sp.C</i>	<i>Bombus vandykei</i>	<i>Halictus tripartitus</i>	<i>Lasioglossum punctatoventre</i>	<i>Lasioglossum cyaneonotus</i>
<i>Anthophora urbana</i>	<i>Ceratina nanula</i>	<i>Halictus tripartitus</i>	<i>Bombus vosnesenskii</i>	<i>Lasioglossum nevadense</i>	<i>Lasioglossum sisymbrii</i>	<i>Lasioglossum mellipes</i>
<i>Anthophorula chionura</i>	<i>Halictus ligatus</i>	<i>Bombus vosnesenskii</i>	<i>Lasioglossum incompletum</i>	<i>Lasioglossum punctatoventre</i>	<i>Lasioglossum sp.D</i>	
<i>Apis mellifera</i>	<i>Hoplitis fulgida</i>	<i>Bombus melanopygus</i>	<i>Lasioglossum sp.A</i>	<i>Lasioglossum sp.E</i>	<i>Xylocopa tabaniformis</i>	
<i>Ashmeadiella aridula</i>	<i>Hylaeus sp.A</i>	<i>Panurginus sp.A</i>	<i>Lasioglossum sp.C</i>	<i>Megachile apicalis</i>		
<i>Bombus californicus</i>	<i>Lasioglossum nevadense</i>	<i>Lasioglossum sp.B</i>	<i>Lasioglossum sp.D</i>	<i>Melissodes communis</i>		
<i>Bombus vandykei</i>	<i>Megachile onobrychidis</i>	<i>Lasioglossum incompletum</i>	<i>Lasioglossum sp.E</i>			
<i>Bombus vosnesenskii</i>	<i>Megachile pseudonigra</i>	<i>Protosmia rubifloris</i>	<i>Megachile onobrychidis</i>			
<i>Ceratina nanula</i>	<i>Oreopasites vanduzeei</i>	<i>Andrena sp.K</i>	<i>Megachile sp.A</i>			
<i>Ceratina punctigena</i>	<i>Osmia coloradensis</i>	<i>Andrena sp.H</i>				
<i>Dianthidium pudicum</i>	<i>Osmia montana</i>					
<i>Halictus farinosus</i>						
<i>Halictus ligatus</i>						
<i>Hoplitis sambuci</i>						
<i>Lasioglossum incompletum</i>						
<i>Megachile apicalis</i>						
<i>Megachile fidelis</i>						
<i>Megachile frugalis</i>						
<i>Megachile montivaga</i>						
<i>Megachile parallela</i>						
<i>Megachile pseudonigra</i>						
<i>Megachile sp.A</i>						
<i>Melissodes communis</i>						
<i>Melissodes lupina</i>						
<i>Osmia aglaia</i>						
<i>Osmia californica</i>						
<i>Osmia cara</i>						
<i>Osmia coloradensis</i>						
<i>Osmia cyanella</i>						
<i>Osmia densa</i>						
<i>Osmia gabrielis</i>						
<i>Osmia gaudiosa</i>						
<i>Osmia montana</i>						
<i>Osmia nemoris</i>						
<i>Osmia regulina</i>						
<i>Triepeolus utahensis</i>						

65 plants surveyed  
-60 native

Rare plants were  
visited by 68 of 143  
bee species

WYRE  
-40 bee species

FRDE -One key  
species from previous  
research absent in  
our surveys (Boyd  
1994)

## Thank you

Dr. Dylan Burge, Dr. Joel Gardner, Dr. Robbin Thorp, Dr. Thomas Zavortink, Jaime Pawelek and all of the technicians and volunteers who have helped add to the collection that is still being processed.

Additional thank you to all of the bee taxonomists out there for bringing bee diversity to light.
