

# NATIVE SEED GROUP

550

acres in  
production in  
California

400

species  
available

1.7

million lbs of  
native seed in  
storage

90%

of seed is of  
known genetic  
origin

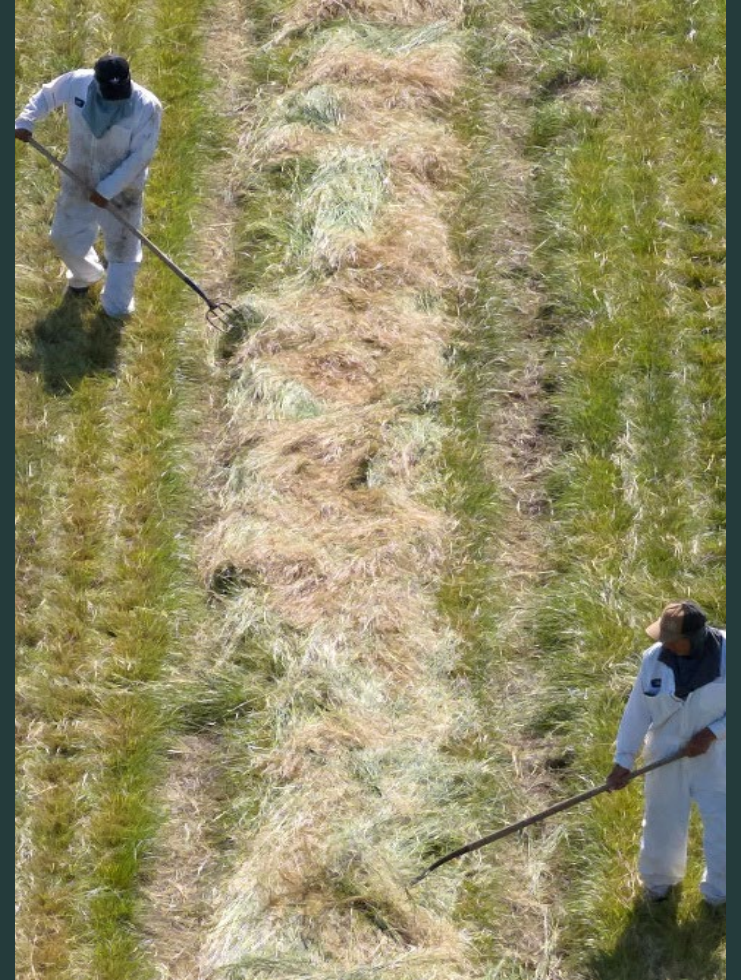

# Managing *S. pulchra* for seed production

THATCHY

MOWED

SWATHED

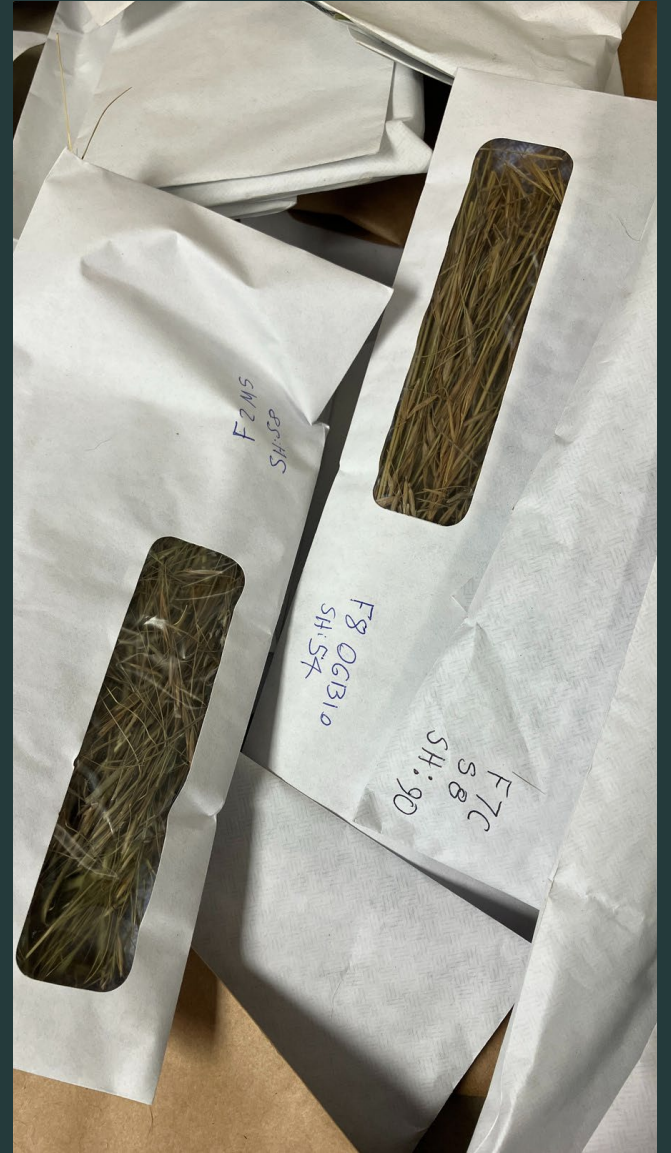

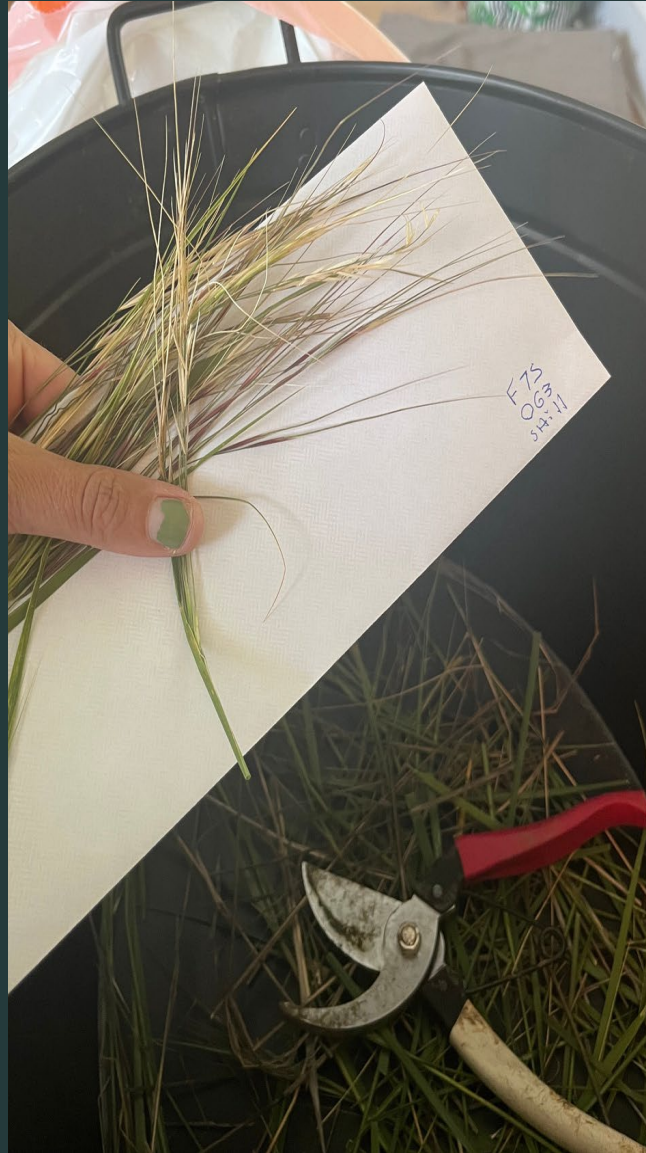

# Managing *S. pulchra* for seed production

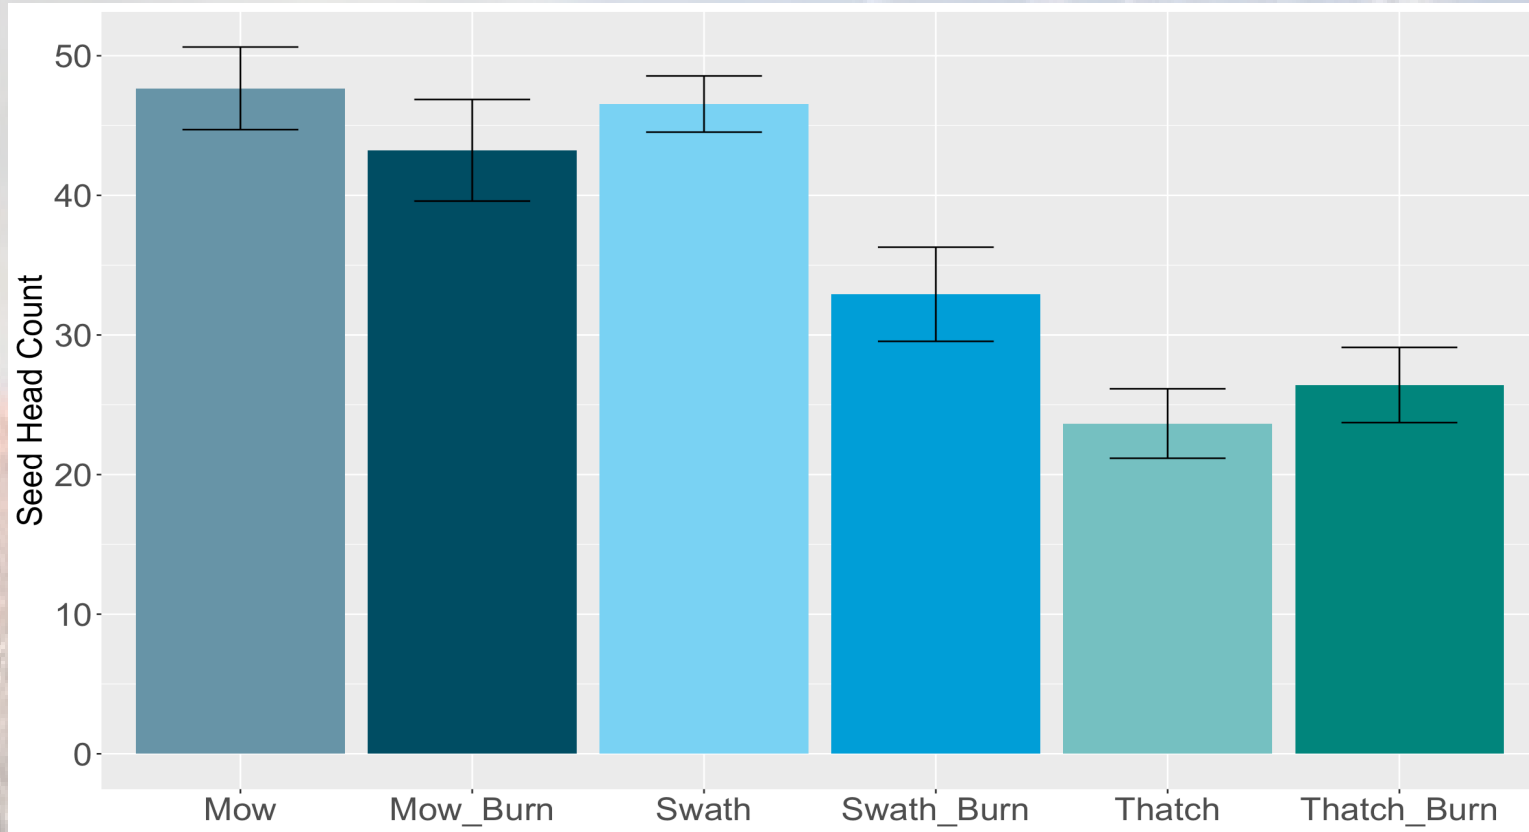

THATCH & BURNED

SWATHED / MOWED & BURNED

TWO-WAY ANOVA (TREATMENT \* FIELD TYPE) PR (>F): 0.000 \*\*\*

- **THATCHY S. PULCHRA HAD THE LOWEST SEED PRODUCTION**
- **MOWING & SWATHING INCREASED SEED PRODUCTION**
- **MOWING BEFORE BURNING WAS MORE EFFECTIVE THAN BURNING ALONE**
